PROJECTS

[Crypto Dashboard](#)

TECH STACKS - **Java, Spring MVC, Spring Core, Spring Boot, Spring Security, REST Api, PostGreSql, JPA, Hibernate**

- Developed a comprehensive cryptocurrency dashboard that provides real-time data and analytics for various cryptocurrencies.
- Designed and implemented the user interface using ReactJS, ensuring an intuitive and visually appealing dashboard layout.
- Integrated APIs to fetch real-time data from popular cryptocurrency exchanges, such as CoinGecko.
- Implemented data visualization features using charting libraries to display historical price trends and performance metrics

[Typing Speed Test](#)

TECH STACKS - **REACT.JS, JAVASCRIPT, FRAMER-MOTION, LOCALSTORAGE, CHART.Js, Firebase**

Developed a web-based Typing Test application that allows users to assess and improve their typing speed and accuracy.

- Incorporated features such as countdown timer, progress tracking, and error highlighting to enhance the user experience.
- Authentication feature implemented using Firebase Authentication.

[My Portfolio](#)

Tech Stacks - React, BootStrap, tsparticles, Responsive Design (Desktop First Approach) | designed and developed a portfolio website using React.js, CSS, Bootstrap, and Particle.js to showcase my skills. This dynamic single-page application features a project section highlighting my work and an about page detailing my background. With sleek styling and engaging particle animations, the website demonstrates my proficiency in front-end development and enhances my online presence, serving as a compelling addition to my resume.

Educational Qualifications

Guru Nanak Dev Engineering College, Bidar, Karnataka (2022) - 82.5%
